Me Against The Night

Crystal Gayle

Moon, please don't shine on me Help me hide his memory Stars, don't light the midnight skies Cos you don't wanna see me cry

Heart, don't let me think of him Lock your door, don't let his memory in I feel the cold wind blowing through A love like this was meant for two

But it's me against the night And I'm afraid it's a losing fight I see you in every shadow of the room You're not here to hold me tight I can't wait til the morning light There's no way to win When it's me against the night

Gone, you said you'd never be And I let you belong with me Burning tears fall down like rain Longing for your love again

But it's me against the night And I'm afraid it's a losing fight I see you in every shadow of the room You're not here to hold me tight I can't wait til the morning light There's no way to win When it's me against the night Me against the night
