

# Nobody Should Have to Love This Way

Crystal Gayle

Well it looks like I'm in line  
For another lonely night  
And I don't know where it all went wrong  
Or what it'll take to make it right  
So I sit by the window  
And I watch the rain fall  
And you don't call

Nobody should have to love this way  
Nobody should have to love this way

It's been a long time since you held me  
And really made it feel like love  
And it feels like I'm just hanging on  
But I just can't give it up  
So I lie in the darkness  
When we're together  
And I remember

Nobody should have to love this way  
Nobody should have to love this way

Is this the way other lovers live  
No-one should have to give  
So much love with no love in return  
A love as true as mine  
Deserves to feel returned in kind  
Oh, but my heart never learns

So I sleep with the memory  
Curled up beside me  
And the need inside me

Nobody should have to love this way  
Nobody should have to love this way  
Nobody should have to love this way
