Fists are aiming high Heads are banging wild Heavy riffs fill the air

Jeans and leather bound Slaves to metal sound For the few for those who dare

It's alright, it's alright
Music loud play it hard
Grab the guitars, start play the drums, come hold your bass, wa
rm up your voice
Come on let's sing our song

Rock until we fall Don't compromise never succumb follow your heart and soul

Metal in our veins
Driving us insane
Makes us feel that we're alive

Scream and shout it out Rocking makes you proud Trust in us we rule the night

It's alright, it's alright...

Rock until we fall...

Yeah... follow your heart... your heart and soul...

Oh... rock until we fall...

Faults we make just remain the same Can't you realise it is rock who's to blame Life's a game that we have to play Can't you realise rock before we bleed
