

The starlight has faded
The lamplight is dimming
And
silence is growing
All around
All around
The
voices are stopping
Eyesight fading too
All around

We're covered by wind
Covered by wind
And if
the universe
Should decide to stop
What then?

What then?
The starlight has faded
The lamplight
is dimming
And all around
We're covered by wind

The shadows slide
Down the mountains
The clouds

Now have blocked out the sun
The shadows have

Blocked out the sun
And if the universe
Should
decide to stop
What then?
What then?
What then?

The shadows move
Down the side of the valleys

Hovering
Too close to home
Too close to home
