The starlight has faded
The lamplight is dimming
And
silence is growing
All around
All around
The
voices are stopping
Eyesight fading too
All around

We're covered by wind Covered by wind And if the universe Should decide to stop What then?

What then?
The starlight has faded
The lamplight
is dimming
And all around
We're covered by wind

The shadows slide Down the mountains The clouds

Now have blocked out the sun The shadows have

Blocked out the sun And if the universe Should decide to stop What then? What then?

The shadows move Down the side of the valleys

Hovering
Too close to home
Too close to home
