

The first years of your life
When you discovered the world
So beautiful and colourful
So exciting was your life

You grow older and older
I wish you never will forget
That you're brother and sister
And this love may last forever

In some parts of our world
Kids are little weapons in disguise
Abused for religious delusion
So many lost their life

It's a shame for me when I can see
The world I offer you
The seed of hope deep in your hearts
May grow and thrive so well

A Chance for our children
They are the ones who can make our world a better place
A Chance for our children
Their little hearts are so dear, so pure and innocent
A Chance for our children
They are our voice and our soul and hope of tomorrow
A Chance for our children
Without our kids we know our time is running out

No love is as true as the love of a child
It's so important to keep this love alive (repeat)

I know you can't change the world
But I hope for a sign
You are the reason why I'm here
Don't let it be in vain

And when I'm dead and gone
Remember my words
My only inheritance
Will live on in you

Still there is a ray of light
As long as we believe in you
It won't be an endless night
I'm sure we gonna see it through
