

## God of Storm

Custard

Far beyond the darkened sky  
The kingdom of eternal night  
Slaves of doom obey his call  
He will come to take your soul away

Ancient rhymes awake the force  
Of death and fear there's no remorse  
The wind blows fast the sea is tough  
Where is the one who's strong enough

Clouds fill the sky feel the pain he'll descent  
God of storm  
See his eyes with the rain he'll descent  
God of storm

He's back to reign our race will die  
There's no escape the children cry  
We lived in fear since we were born  
Afraid of him the god of storm

The end is near no turning back  
The final wave his last attack  
Some magic words of violence  
A mighty burst eternal silence
