

Wheels of Time

Custard

Do you know what it's like To feel a dream inside you die Do you know what it's like To see that time is rushing by

Do you know what it's like To cling to fading memories Do you know what it's like To count missed opportunities

BridgeI Traces of what might have been Lay withered all around
The magic of once cherished days Has died without a sound

Chorus The wheels of time Never stand still They don't obey your force of will

Do you know what it's like To hunt for visions endlessly Do you know what it's like To see aims turn to fantasy

BridgeII Face the facts and clear your mind The truth is hard to take
Stand up to reality The faith you keep is fake

Chorus The wheels of time Never stand still They don't obey your force of will
Some things you have to leave behind So face the facts And clear your mind
