

# Take Me Over

Cut Copy

Do you hear the voice inside your head  
Whispering to live your dreams instead  
Some people cling to what they know  
But I woke up now it's time to go

Uhhh I can hear it calling  
Uhhh did you see me falling  
In and out of love  
Uhhh I can hear it calling  
Uhhh did you see me falling

Take me over, now take me out  
give me something to dream about  
take me over, take me out  
To the jungle through the night in paradise, paradise  
Take me over, take me out  
To the jungle, through the night forever

All the things in only on the screen  
thats the way to live  
City's memories promise stereo  
But don't sleep, cuz now it's time to go  
Uhhh I can hear you calling  
Uhhh did you see me falling

Take me over, take me out  
To the jungle through the night in paradise, paradise  
Take me over, take me out  
To the jungle, through the night forever

You may not notice now, what people talk about you  
Some people think that we're running away  
I'll push the  
it's all I ever done, so give me a reason to stay

Uhhhh, uhhhh

Take me over, take me out  
To the jungle through the night in paradise  
Take me over, take me out  
To the jungle through the night forever, uhhh
