

# Don't Let It Bring You Down

Cutting Crew

Make me a promise you can't keep  
Tell a joke that's not too deep  
'Cos I'm out of double meanings

Throw me a rope that I can't reach  
As you lay back on your beach  
I'm not waving, only drowning  
But don't let it bring you down  
Don't let it bring you down

Who asked you for your advice?  
Who asked you to interfere?  
All my life you kept the lights out  
Now it seems so clear  
Who asked you to criticise?  
I don't need no volunteer  
So when they come to put the fires out  
I might not be here

Don't let it bring you down  
Don't let it bring you down

Buy me a beer that I can taste  
Like the kisses that you waste  
'Cos I'm out of legal tender

Big deal, there's a little rust in my piano  
A few more lines upon my face  
There's corrosion in my fingers  
But don't let it bring you down  
Don't let it bring you down

Who asked you for your advice?  
Who asked you to interfere?  
All my life you kept the fire on  
It still gets cold in here  
Who asked you to sympathise?  
I don't need your volant tears  
So when they come to turn the lights out  
I might not be here

Don't let it bring you down  
Don't let it bring you down
