

## It Shouldn't Take Too Long

Cutting Crew

Too many times have I told you, feel your way  
If it's question of answers, then have your say  
Don't go giving me reasons, we all have a price  
And in that moment of indecision, you'll never understand why

It shouldn't take too long, to set the thing moving  
It shouldn't take too long, so long as you believe it  
It shouldn't take too long, (to get what you want)

Forget the popular notion, lead the way  
You've never known what you wanted until today  
Through fire and water, you, you can survive  
To make the best of the situation, you have to understand why

It shouldn't take too long...

When I was a boy in the summer rain  
Every hour seemed days to me

It shouldn't take too long...
