

Falling Out

D.I.

Everywhere I look around and everywhere I see
Everyone's hysterical a mass catastrophe
No future - no future
No time - no time
Sellouts in the church are singing songs of doom
Running like headless chickens
As they reproduce to the womb
No future - no future
No time - no time
No survivors
No survivors
No revivers
No revivers
None, they're all gone
They keep on falling out
Falling out
Lying and into the dust
Falling out
Falling out
Time and turn into rust
Have a good time while there's still time
Guns are blaring, skies are glaring
when it's all done they'll be no one
Sacrifice the world that'll make you a man
Your life falls in line with the master plan
No future - no future
No time - no time
Unstable hands are ready to explode
The light turns red it's time to overload
No future - no future
No time - no time
No survivors
No survivors
No survivors
No survivors
None, they're all gone
They keep on falling out
Falling out of line and in to the dust
Falling out
Falling out
Time could be each and everyone of us
Have a good time while there's still time
Guns are blaring, skies are glaring
When it's all done, they'll be no one left
People dying, mother's crying
Password's spoken, no one's jokin'
Close your eyes and you'll be over
Blow yourself away
