

Goldrush

Daggers

Do you goldrush tonight?
I wouldn't lead you astray
You've always had enough
To throw it all away
But I watch you tomorrow when you ...
It's running down my spine
And I just hope it's like the first time

So tonight I could change
I might not make it back tomorrow
But I won't fall far from grace
I feel like going fool to follow
But I don't feel the words like I used to

Take what you came for
There's nothing left to steal
You never felt alive
Don't tell me how to feel
Doesn't matter if you don't think it's true
I've never felt so used
Just remember it's the last time I knew

Tonight I could change
I might not make it back tomorrow
But I won't fall far from grace
I feel like going fool to follow
But I don't feel the words like I used to

I could recall
I'm thrilled below
Makes me feel so small
And I'll always tell these lies
Don't ask me why tonight
I could change
If you won't take it back tomorrow

Tonight I could change
I might not make it back tomorrow
But I won't fall far from grace
I feel like going fool to follow
But I don't feel the words like I used to
