

# The Witnesses

Daggers

you could be the cure but i've forgotten what they call the disease  
i keep looking and i swear that you're staring at me  
where did you go?  
what did you see?  
and do you think they went for me? well?  
and if you want to make a night of this  
then just let me know  
just let me go  
stranger sodomy, dangerous autonomy

the witnesses, to your own lives  
witnesses, watching us all die

i was looking for a reason, you were looking at me all night long  
i'm all over you, the witnesses are turning me on  
what did you see?  
they went for me  
and i just stood and took it all for you  
so if you want to make a night of this  
then just let me know  
just let me go  
you'd fall for nothing, i saw you there killing with

the witnesses, to your own lives  
witnesses, watching us all die

the blood keeps running to my eyes  
the witnesses and alibis  
they died among the disco lights  
and i stood there alone

the body parts were everywhere  
the witnesses could only stare  
i didnt leave you standing there  
you chose to be alone

and even though you left me with your bones  
you know i was scared to watch you go

the witnesses, to your own lives  
witnesses, watching us all die
