

# Time Travel

Daley

They say live within the moment  
Cause there's nothing else but now  
But I'm sleepless and it's over  
So somebody show me how

I can get back to a feeling  
That existed in the past  
Find somebody with some meaning  
Try to equal what we had

I wanna go  
All the way, all the way  
All the way back...  
All the way, all the way  
All the way

All I really need  
Is time travel and you  
Don't know what this is  
We're travelling through  
All the memories  
Unravel with you  
So all I really need  
Is time travel  
And you...  
And you...

It's the silence that will save us  
Now all too much has been said  
We no longer know the people  
That we cling to on the bed

Is it beyond reparation?  
Does this have to be the end?  
In an alternate dimension  
Maybe we could start again

I wanna go  
All the way, all the way  
All the way back...  
All the way, all the way  
All the way

All I really need  
Is time travel and you  
Don't know what this is  
We're travelling through  
All the memories  
Unravel with you  
All I really need  
Is time travel  
All I really need  
Is time travel  
All I really need  
Is time travel
