## Anything

If you could have something Anything that you want it Tell me, girl, what would it be There is no limits to do Anything that you want to You could have everything you need

I've been waiting all my life To have someone to talk to So, tell me now, could it be That I found someone for me

When I see your smile I'm walkin' on a crowd I would do anything to have you near me When I see your face It makes my heart race I would do anything to have you near me, baby

Give me some time To tell you what's on my mind I have so many things that I want to say I wanna see you, be a part of what you do Everywhere, you lighten up my day

You know that I would do anything Oh, ooh..., yeah, yeah, oh, yeah... Anything, anything Girl, I would do anything... Damage
