

Big Deal

Damien Jurado

It's like I told you
You'll never be as good
And there's someone always better
To take your place

Once you were the first in line
Now you're in the back
Receiving cards and thank you letters
PS please don't come back

It's like I told you
You'll never be as fast
And there's someone always faster
To take your place

Once I told you things look brighter
And now they're turning black
In this world without a compass
And you can't find your way back

It's like I told you
It's like I told you
It's like I told you
It's like I told you

Once I told you that things look brighter
And now they're turning black
In this world without a compass
And you can't find your way back

It's like I told you
It's like I told you
It's like I told you
It's like I told you
