

# I Still Miss Us

Damien Leith

I'm  
I'm not the one  
The one who is right for you  
I can't explain it's already said and done baby now  
The time that has past us  
The images fade away  
And all that I've got is thoughts of the past

And I still miss talking  
I still miss walking  
My heart just wont give you up  
I'm a shadow on the run  
Waiting for the sun  
I still miss us

These days I try to forget you  
Start to make some sense  
The road up ahead the one left behind  
Forget the lie  
The fading in our lives  
But somewhere deep inside  
It's a shining there for you and I

And I still miss talking  
I still miss walking  
I still miss the sound of your voice  
Like a whisper in the wind  
That takes me back again  
I still miss us

And we've come such a long way  
And I feel like I'm on to losing it  
And I know I said some stupid things  
But I cannot take it back

And I still miss talking  
I still miss walking  
I still miss the sound of your voice  
Like a whisper in the wind  
That takes me back again  
I still miss us  
Mm-oooh  
I still miss us  
Ooh
