

# Caroline

Dan Hill

Well I've been way so long  
I'm too numb to dislike it  
And la's one big hit song  
I never learned to fight it  
Dear caroline  
It never meant to go this far  
It started out to be a game  
I never meant to be a star.

And everybody smiles  
But their eyes stare out so empty  
From a face they scrub with dial  
And the words that spill so fancy  
Dear caroline  
I thought my songs would change the world  
Instead of slowly getting rich  
Off the emotions of young girls.

Chorus:

And what really makes me laugh  
Is that nothing's really changed  
Since that day I left you years ago  
To find myself a name  
And what really makes me cry  
Is that it's only an illusion  
And all that success means  
Is just money and confusion.

I've been told you settled down  
Found yourself a family  
I'll send my latest record down  
The critics tell me that it's happening  
Dear caroline  
There's nothing really left to say  
I hope you still remember me  
After the songs all fade away.

Repeat chorus
