Come on outside I got something to show ya
The sun is sinkin' and I'm dying to hold ya
There's a summertime southern breeze blowin' in the air tonight
Turn on the stereo, and leave the door open
Let's watch the moon and the fireflies glow in the sky
Forget the day and let it float away baby
Let's lose track of time

And just, sway put your head on my shoulder, let the music come and take us over

Let me pull you in a little bit closer, baby close your eyes wh y don't we just

Stay right here in the moment, I wanna feel ya movin' nice and slow yeah

When there's nothin' words can say, let's dance the night away and just sway

We don't need a DJ or a dance floor So leave your high heels there by the back door 'tween you and me we got all that we need So let me hold ya tight from left to right baby

We can sway put your head on my shoulder, let the music come an d take us over

Let me pull you in a little bit closer, baby close your eyes wh y don't we just

Stay right here in the moment, I wanna feel ya movin' nice and slow yeah

When there's nothin' words can say, let's dance the night away and just sway, yeah

Just sway, yeah

My hands on your hips, your lips on my lips, kissin' all the wo rries away

Losin' ourselves, ain't nobody else around here to get in the w ay Sway

We can just sway put your head on my shoulder, let the music co me and take us over

Let me pull you in a little bit closer, baby close your eyes wh y don't we just
