

# Midnight Crusade

Dance Gavin Dance

Used to be so judgemental  
Now I respect the ones  
Who dare to be sinful  
Always searching for my pride  
Now I know it's all fleeting  
Just glad to be alive

Pretty sure it's sparrow furnace, trying to find my making  
Got mistakes and branching outings  
Switching off my maker  
The more I try to sleep it off the more I started thinking  
I wanna live in my self-portrait, others drink and shrieking

You're salty, can't fault you  
Unknown to the rhythm that guides you  
Take all your confetti away

I know, I know it's killing me  
Don't need your love or sympathy  
I know, I know just what you say  
Don't you try to rescue me

I know magic turtle gutters filler lightning sprap  
We need to spend some time alone to understand this path  
There's different types of ways that makes our mind is sewn in two  
Addicted in formation and it starts it out for you

Won't fight you, not like you  
But unknown to the rhythm that guides you  
I'll take your confetti away

I know, I know it's killing me  
Don't need your love or sympathy  
I know, I know just what you say  
Don't you try to rescue me

Don't you try to rescue me  
Don't you try to rescue me

Now you're on a midnight crusade  
Flexing your stats  
But you can't touch me, touch me, touch me  
Tell me how to think my own way  
You can give it your best  
But you won't touch me, touch me, touch me

I'm kissing a baby and licking the poop  
I'm living to die I put meat on it too  
My bitches is pregnant and throwing up food  
I'm smoking a chicken I took off the coop  
Show off addiction and make itself fix it  
I'm selling art if you're dead in the park  
Feel like I'm dead show em your head  
Give up your life for the virtual clock  
Show off the women, then watch them appear  
Now you're a sparrow, let's share us the lyricists  
Show off the women, then watch them appear

Now you're a sparrow, let's share us, the lyricist sucks
