

I Still Think About You

Danger Danger

Lying all alone in bed
Crazy thoughts running through my head
Thinkin' about you

Tryin' hard to let it go
My head says yes but my heart says no
I wish I never had to choose

I've been walking down the same old road
Tryin' hard to forget you
But I just can't let you go

I still think about you
Do you think about me?
I still think about you

No matter where you go
Just as sure as a cold wind blows
I still think about you
Do you think about me?

Baby, I remember when
You and me were best of friends
We crossed our hearts and swore it lasts forever

But I guess that lovin' me
Was just a temporary thing
And I wish to God that we were still together

I hope you found what you were looking for
It's been 3 years, a lot of tears
Ain't got nothing but this song

I still think about you
Do you think about me?
I still think about you

No matter where you go
Just as sure as a cold wind blows
I still think about you
Do you think about me?

When you're all alone
When you need a friend
I guess it doesn't matter
'Cause what we had we'll never have again

Lyin' all alone in bed
Crazy thoughts running through my head
Thinkin' about you

I still think about you
Do you think about me?
I still think about you

No matter where you go
Just as sure as a cold wind blows

I still think about you

Ohh...

I still think about you

Do you think about me?

I still think about you

Yeah...

No matter where you go

Just as sure as a cold wind blows

I still think about you

Do you think about me...?
