

# I Had A Dream

Daniel Johnston

I had a dream about you  
You were the queen of quite a few  
And I was there, but you didn't care  
I didn't matter somehow.

The band played and you sang a tune  
And the stars fell down from the moon  
And you smiled a smile that parted the sea  
But you didn't notice me  
No.

Your eyes filled up the sky and they were blue  
And you had a weird monkey there with you too  
And you danced a jig and tipped his hat  
And you turned around with a grin so fat  
And he was me.

There were lights and fireworks and cannons going off in your honor  
And I was worried,  
But a man said "Don't worry, nothing can harm her"  
And I grabbed the microphone and I stood all alone  
And I looked up at you, and you looked down at me  
And then you said "Off with his head".  
I had a dream about you
