

Love Will See You Through

Daniel Johnston

If you got a girl you should treat her kind
Always give a loving sign to let her know
Take out onto the town, you could be a funny clown
If she wants to laugh

'Cause love will see you through
It's got to make things new
The future could be good
You've got to and it should

Suddenly she misunderstands
Takes her tears and then she ran down the hall
Promise her anything, wedding ring, anything
Before she goes

You could have some kids
Just like Dad and Mommy did so long ago
But tomorrows could be so bright
Way out, way out of sight if you're wise
'Cause love will see you through
It's got to make things new
The future could be good
You've got to and you should

Always keep your heart in tune
Don't leave bad habits laying around for her to see
Always do the best you can
And you'll be a happy man, wait and see
