```
G C G
I've been through some (hard?), but I'm feeling so much better
& I'm standing in your yard, I could be there forever
Em C Am D
& I know if you saw me now, you would be quite perplexed
Em C Am D
& I know if you saw me now, your mind would be contorted
But I love you.
C G
Everytime I think of you, the sun shines brightly on my soul
But there's something missing, part of you-part of the whole.
(the rest of the song follows the pattern above)
I cried a million tears-filled an ocean with my sorrow
& if I had my way, I'd be up to see ya tomorrow
& I know if you saw me now, you would be much perplexed
& I know if you saw me now, your mind would be contorted.
But I love you.
Everytime I think of you, I feel like writing a song
& if I could win your heart, I never thought it'd take so awful
long.
& I wished upon a star-hoped that we could get together
I'll be standing in your yard-we could be there forever.
& I know if you saw me now, you would be much perplexed
& I know if you saw me now, your mind would be contorted
& I know if you saw me now, you would be much perplexed
& I know if you saw me now, your mind would be contorted.
But I love you.
