

# When I Met You

Daniel Johnston

When I met you  
I saw the future of the future and what to do  
Cna you see me now  
I'm more than willing and I want to be your pal

Life's crooked hand  
Has already pushed us back together again  
I want you awful now  
And I'm worrying how you see me plain  
Do you really really have to know my name  
Time marches on  
The parade and the charade keeps turning round  
I look for you  
In every book in every cartoon movie too  
I saw the past  
Tomorrows always go they never really last  
I found the truth  
AND I swear it nearly flipped me through the roof

I broke through fate  
But every time I would up being sort of late  
When I met you  
I saw the future of the future and what to do
