

# That's What Angels Do

Danielle Peck

He drove away, I couldn't move  
First bitter taste of what love can do  
Sat on that porch, alone and cried  
It hurt so bad, I could have died  
Then mama came out  
Wrapped her arms around me  
Told me  
God has someone better for me  
Dried my tears, and she just held me

That's what angels do, that's what love is for  
To point you to a window when you can't find the door  
When you're all out of faith, it's more than you can take  
You're not strong enough you need someone to pull you through  
That's what angels do  
That's what angels do

Big city streets, bright city lights  
Some days the dream's not worth the fight  
Miss my hometown, wide open space  
A clear blue sky, a slower pace  
Then my phone rings and I hear his voice  
Say baby girl, I'm proud of you, you're not alone  
He gives me hope, he lifts me up

When you're all out of faith, it's more than you can take  
You're not strong enough you need someone to pull you through  
That's what angels do  
That's what angels do

When there's no way on earth  
You can't make it work  
That's what angels do  
That's what angels do
