

Never Again

Danny Fernandes

Baby stop and think about it
Tell me where did we go wrong
How did it end like this
Can we work it out, I doubt it
We did all we could
And baby I can't go on like this
I never did you wrong your trippin'
Listening to your friends and all the bullshit they had to say
It's like they loved you more than I did
So baby roll with' your crew
And do what you gotta' do because

I never wanna kiss you again
Never wanna walk through the park holding your hand
No more talking all night until the early morning
It's such a shame to say that we'll never be the same... again

Baby stop and think about it
You lied to me, lied to me
Baby stop and think about it
You lied to me, lied to me

The love we once shared girl no longer
It no longer remains and now it's harder, the pain because
She never really knew she wondered
Was she being untrue or was I being a fool because
I'm gone and I'm never coming home
So baby don't call cause I won't answer the phone
Stay out of my life baby just leave me alone
And it's such a shame to say that we'll never be the same

I never wanna kiss you again
Never wanna walk through the park holding your hand
No more talking all night until the early morning
It's such a shame to say that we'll never be the same... again

Baby stop and think about it
You lied to me, lied to me

Girl you told me you'd be there for me
Promised that you'd never leave
You lied to me

Now I'm closing the door
Put my heart on the floor
I don't love you no more
That's why I

I never wanna kiss you again
Never wanna walk through the park holding your hand
No more talking all night until the early morning
It's such a shame to say that we'll never be the same... again
