

# Never Again

Danny Fernandes

Baby stop and think about it  
Tell me where did we go wrong  
How did it end like this  
Can we work it out, I doubt it  
We did all we could  
And baby I can't go on like this  
I never did you wrong your trippin'  
Listening to your friends and all the bullshit they had to say  
It's like they loved you more than I did  
So baby roll with' your crew  
And do what you gotta' do because

I never wanna kiss you again  
Never wanna walk through the park holding your hand  
No more talking all night until the early morning  
It's such a shame to say that we'll never be the same... again

Baby stop and think about it  
You lied to me, lied to me  
Baby stop and think about it  
You lied to me, lied to me

The love we once shared girl no longer  
It no longer remains and now it's harder, the pain because  
She never really knew she wondered  
Was she being untrue or was I being a fool because  
I'm gone and I'm never coming home  
So baby don't call cause I won't answer the phone  
Stay out of my life baby just leave me alone  
And it's such a shame to say that we'll never be the same

I never wanna kiss you again  
Never wanna walk through the park holding your hand  
No more talking all night until the early morning  
It's such a shame to say that we'll never be the same... again

Baby stop and think about it  
You lied to me, lied to me

Girl you told me you'd be there for me  
Promised that you'd never leave  
You lied to me

Now I'm closing the door  
Put my heart on the floor  
I don't love you no more  
That's why I

I never wanna kiss you again  
Never wanna walk through the park holding your hand  
No more talking all night until the early morning  
It's such a shame to say that we'll never be the same... again
