

# Overdose

Danny Fernandes

Can't breathe, you've done it again  
You stab me right in the chance  
How can I trust you the last goodbye, goodbye.  
Right now you're just like [?]  
Whipping these tears from my check  
Selfish infliction, fuck this addiction goodbye, goodbye.

Overdose, can't get close, can't get close  
Your arms are broke, and they can't fly  
We just high, just high.  
Overdose, leaving all  
Your wings are broken, we can't fly,  
You're just high, just high.

My [?] are callin' again  
Laughing at me on my pain  
Crushed by lies, fallin' like the rain, the rain  
I probably ever blame  
I should've put out the flame  
I was blinded by the lie  
when the fall [?] till the end, till the end, heey.

Overdose, can't get close, can't get close  
Your arms are broke, and they can't fly  
We just high, just high.  
Overdose, leaving all (leaving all)  
Your wings are broken, we can't fly,  
we're just high, just high.

Who do I trust?  
Who do I believe?  
Why can't I love?  
You left me to piece.  
Who do I trust?  
Who do I believe?  
What can I love  
You left me to bleed.

Overdose, can't get close, can't get close  
Your arms are broke, and they can't fly  
We just high, just high.  
Overdose, leaving all (leaving all)  
Your wings are broken, we can't fly,  
we're just high, just high.
