

Cold times remembered
Cold times, no more
Anger, my best friend
Kept close and whole
He calls now they rake down
Life screams as the brain crowds
Cold stains of memory
Reach back for more
Liberate my skull, liberate my skull
Liberate my skull, liberate my skull
Voodoo dismember
The dead will crawl
For all those who've never
Felt the sting of cold
He calls now they rake down
Life screams as the brain crowds
All things remembered
Angels refound
Liberate my skull, liberate my skull
Liberate my skull, liberate my skull
He calls now they rake down
Life screams as the brain crowds
All things remembered
Angels refound
Liberate my skull, liberate my skull
Liberate my skull, liberate my skull
