

Explode

Dappy

It's not a science, now,
It's just a way it goes.
You spin me all around,
No gravity, no ground.
My world is your snow globe,
You turn me upside down.
You know I like the shake
You make my heart quake.

You speak and I'm rumbling
You move and I'm blundering
Slowly I'm losing control.

I feel it banging,
Got me vibrating.
You got me and I'm falling, so don't let me go.
No one could save me,
No drug could fix me.
It hit me now, I feel like I'm going to explode.
It hit me now, I feel like I'm going to explode.

You're looking in my face and I can't keep it down,
I let the words escape, I've gone and shout it out.
No one can help myself, I can't control it, babe.
I feel it building up,
You got me blown away.

You speak and I'm rumbling
You move and I'm blundering
Slowly I'm losing control.

I feel it banging,
Got me vibrating,
You got me and I'm falling, so don't let me go.
No one could save me,
No drug could fix me.
It hit me now, I feel like I'm going to explode.
It hit me now, I feel like I'm going to explode.

I'm the daddy and you know that,
You know once you go Dap you never go back.
Should be on my shhh,
Even though she got a man at home.
Three words: whipped Indiana Jones.
I'm gonna take a back seat,
But only if you get in front.
Body smoking, she loves it when I'm being blunt.
Sun kissed skin, straight from the Caribbean.
You a good girl, pretty bad news
See that you ain't in for the mullah,
Don't think 'cause you're hot, I won't throw you in the cooler.
You know you're my bad b, so you hold that,
I won't look into your eyes 'till they roll back.
Put it down on me, baby do it nice and slow,
If you ain't that then time show me something that I don't know.
If you're a time bomb, then I'm gonna make you blow
Just leave them high heels on and turn them lights down low.

I feel it banging,
Got me vibrating,
You got me and I'm falling, so don't let me go.
No one could save me.
No drug could fix me.
It hit me now, I feel like I'm going to explode.
It hit me now, I feel like I'm going to explode.
It hit me now, I feel like I'm going to explode.
