

Step Into The Light

Dara Maclean

It bends you, breaks you
Takes you where you don't want to go
So what did it cost you when you gave that piece
Inside your heart to feel like you belong

Hey, hey, hey, shackled by the shame
But love can break the chains

Step into the light
Open up your eyes
It's already done, He's already won the fight
What we really need, good news is, it's free
All we have to do is step into the light

I've been love hungry, always trying to fill the void
And it leaves you wanting more
But when it's real, you feel it reach inside your heart
It only restores

Hey, hey, hey, I'm so tired of trying
Gonna let grace be like sunlight shining

Step into the light
Open up your eyes
It's already done, He's already won the fight
What we really need, good news is, it's free
All we have to do is step into the light

The light

Can you feel it, can you feel it
Pouring down on us
No more darkness, can you see it
We're walking in the light, the light of love
Yes we are, come on, come on

Step into the light
Open up your eyes
It's already done, He's already won the fight
What we really need, good news is it's free
All we have to do is step into it
All we have to do is
It's for me and you
It's simple, but it's true
Just step into the light
