

# Walk The Distance

Darin

I can still see your face  
But I still can't explain  
U were there so suddenly  
And as you walked away from me  
I knew that we were meant to be

Holding on to my hope  
But I've just got to know  
Will you do what it takes?

From the mountains to the seas  
Across the miles of memories  
Through the endless dark  
SaY you'll walk the distance to my heart  
Past the walls of fear and pride  
To a place where love can't hide  
Searching for a spark  
Say you'll walk the distance to my heart

Maybe times we lose track and have  
To fight our way back (yeay)  
But even more than before  
We know what we're reaching for  
You're my date with destiny  
And whatever goes wrong  
Got to keep holding on  
I got to do what it takes

From the mountains to the seas  
Across the miles of memories  
Through the endless dark  
Say you'll walk the distance to my heart  
Past the walls of fear and pride  
To a place where love can't hide  
Searching for a spark  
Say you'll walk the distance to my heart  
(say you'll walk the distance to my heart)

I can still see your face  
Like an angel in time and place  
Got to turn every stone  
Take every road  
Got to keep holding on  
Got to do what it takes

From the mountains to the seas  
Across the miles of memories  
Through the endless dark  
Say you'll walk the distance to my heart  
(say you'll walk the distance)  
Past the walls of fear and pride  
To a place where (ooh) love can't hide  
Searching for a spark  
Say you'll walk the distance to my heart (Oooohh)  
Say you'll walk the distance to my heart
