

What You're Made Of

Darin

Let's go yes I know, everybody knows you've got that feeling
Get up now yeah get on up and show us all what you're made of
Oh no yes I know every time I do
I get all the attention
Get up now yeah get on up and show us all what you're made of

When I'm thinking, every day every night every time I see
What I got and what the world is, damn it's good to me, yeah
When you're watching everything seems so good but what happens
inside
get up now yeah get on up and show us all how to move that far
Oh can't you see if you got the will you make it far
You gotta try, try, try and fight, fight, fight cause you gotta
do what's right c'mon

Hey sweetie baby did you know that everything I see in you
Makes me blow away, yeah
And did you know that you yeah ah you can do it
Get up now yeah get on up and do something about it
Oh can't you see if you got the will you'll make it far
You gotta try, try, try and fight, fight, fight cause you gotta
do what's right, c'mon

Crazy sexy cool you name it,
bring it all don't wait just stay there
bring it on, bring it, bring it on
Just pull your hands back cause I said that
Seeking, looking for my game,
cryin over all that fame
All the time it never came so show us all what you're made of

Let's go yes I know, everybody knows you've got that feeling
Get up now yeah get on up and show us all what you're made of
Oh no yes I know every time I do
I get all the attention
Get up now yeah get on up and show us all what you're made of
