

## Now Or Never

### Dark Age

It is the same old path to nowhere  
Built from the hands of deceit  
Tenacity has failed to repair  
the ruins of our hearts  
That once had been complete

This is the time to carry our pride  
This is the time to believe and to reunite

It's now or never  
We can make this dream last forever  
All we need is in us  
Let it all out to be free  
It's now or never  
We can make our selves come together  
All we are is in us  
Let it all out to be free

These inner walls are insecure  
Complicity calls, unmask us fragile  
We got free in us what is pure  
A revelation that is not hostile

This is the time to show all our pride  
This is the time to stand up and to reunite

We play dark and heavy Metal  
Born to fight this abrasive battle  
We are a kind of new impulse  
Your engine to achieve allied results
