Merciless Death

Dark Angel

You fall before us, shattered in vain You thrash about us, screaming in pain Tortured and flaming, you're on your knees You fucking whores, it's us you must please

We'll give you merciless... death!!!

Stand up and bang, till you fall to the floor The sound is so deafening, it can't be ignored The place is burning, your minds are destroyed Devastated and helpless, you're left here to die

We'll give you merciless... death!!!

The angel has landed - judgement has come Your death has arrived, faster than some The darkness descending upon heaven's gates Your soul is now promised and you know that We'll wait!!!

We'll give you merciless... death!!!
