## The Night of the Age

**Dark Moor** 

When the golden dusk covers me And the beams play with the trees Memories so come to my heart Because the guardian of the dreams departs [Bridge:] Who stole my illusions? Who stole my hopes? Why did the light off And since I grope? Where will I find the force To untie the past's rope in my soul? [Chorus:] Go on Within the black night of the age getting my sadness turn to rage Even oblivion So feeling will be free again the dreams will break the chains flying to the eternity Sometimes in dreams I see her eyes Watching me like wells of lies Those in the cold cloak of the night Were my sole flame , of whom I was acolyze [Bridge] [Chorus] Where are the guardians of the dreams? Return to me Tell me answers that my mind will [Chorus]
