

The Star

Dark Moor

With living bright
Of harmony
In the still night
Of reverie
A single star
When nights along
Suggests the river
The stream song

[Bridge]
The star seems an eye
With a wider scope
Which can see the hope
If the soul could fly
Would see from the sky
Everything can be forever

[Chorus]
Gleams from far
The hopeful lucky star
While waters mix below
No matter where they go
And world is just a chance
With whole significance
In the life
All is in bloom
Beneath the star

The river glows
With the sky light
The star just flows
In the fluid night

[Bridge]
The star seems an eye
With a wider scope
Which can see the hope
In the soul could fly
Would see from the sky
Everything can be forever

[Chorus]
Gleams from far
The hopeful lucky star
While waters mix below
No matter where they go
And world is just a chance
With whole significance
In the life
All is in bloom
Beneath the star

If the soul could fly
Would see from the sky
Everything can be forever

[Chorus]

Gleams from far
The hopeful lucky star
While waters mix below
No matter where they go
And world is just a chance
With whole significance
In the life
All is in bloom
Beneath the star
