

Anywhere

Dark New Day

I'm taking a stand
but not to create distance
or leave you in the dark
Showing you a picture
can only go so far
I think that you should go with me
so you can feel it too
and if your mind is open
there's so much we can do

I can almost see the stars aligning
to say

I'm gonna take you anywhere
I want to go
I'm gonna make you want me
to keep on going

I'm starting to bend
the line between reality
and the place we want to be

Living vivid motion pictures
starring only you and me
and in this precious moment
the current starts to flow
Don't you ever break the connection
and I'll never let it go

I can almost see the stars aligning
to say

I'm gonna take you anywhere
I want to go
I'm gonna make you want me
to keep on going

Can you feel the rush
Here you can get too much
can get too much

Yeah, I'm gonna take you anywhere
I want to go
I'm gonna make you want me
to keep on going
to keep on going
