

# Shadow in Our Blood

Dark Tranquillity

We are delusional, down goes mortality  
Still we fight off and create as the only creatures  
In a life kept secret  
Ways that stand the point left beyond

No! There is a void between our hands  
That drowns us out of light,  
An arrow lazed in liquid darkness

For every sun Gods heart

No! It has always been right here  
Like a shadow in our blood  
No! It waits for you and me  
A shadow in our blood

We are delusional from fiction of reality,  
To prayers of prosperity,  
Our loneliness, that we resist your pale attraction  
Give into the dream with your benevolent

Oh will this world within a world live on (fun)?  
Another page torn from the book of secrets  
Where was I when the  
Voices made no sound  
And remembers the hours

No! It has always been right here  
Like a shadow in our blood  
No! I cant waits for you and me  
A shadow in our blood

[guitar solo]

Here in the barren land still  
Far from the shores of real  
Beings born beyond borders  
What we even thought that once  
You were invincible

No! It has always been right here  
Like a shadow in our blood  
No! It waits for you and me  
A shadow in our blood
