No Future

Darkbuster

It's hard to believe that there ain't anymore You're ash to ash you're dust to dust

You wanna know why I live like there's no future You wake up one day it'll all be gone It's all gone

Live life like there's no future Live like there's no future tonight

Where did you come from and where have you been? You're playing a game you can never win You won't win

You wanna know why I live like there's no future You wake up one day it'll all be gone It's all gone

Live life like there's no future Live like there's no future tonight
