

The Patriot Virus

Darkest Hour

We are the embarassment to market suicide
Without eyes full of genocide
We live where flags can buy more than others' lives
Where it's fashion to show your love homicide [homicide, most likely]
Of the victim we haven't seen enough
For the victim it's the escape that keeps them drugged
It's the best blood money can buy
It's the best way to fund genocide
A violent missionary sect
Feeds a bullet for every word against
Salvation in a warhead
The patriot virus is being spread
The only antidote they give is to fear what's next
Prepackaged and advertised with a hymn
Singing anthems for the walking dead
Fear what's next
