Fucked Up and Ready to Die

Darkthrone

Stripping on twisted knives in miscreation Norway be my grave Increasingly insecure Combine with stagnant joy

Half my life in your name Fucked up and ready to die

Death just takes a moment Suffering is forever

Let's leave this sinking ship together The water of life will fill your lungs Drink 'till you bleed When contradictions fail to soothe

Half my life in your name Fucked up and ready to die

Murder only takes a moment It'll last you forever
