

## Rex

## Darkthrone

Engulfed in frost  
I sailed our dreams  
Gloomy inner landscapes come to life

I am the wolf in the darkest scene  
Phantasms sweep my role  
I am Lucifer, I bring you light and pride

Three steps for the white  
A journey for the black  
No flags for the tens lines  
(but) I'll shoot you full of signs

In other dimensions  
My visions grew black wings
