

# Hurt

Darren Hayes

If you want something broke you better give it to me  
Got a way of disappointing that you wouldn't believe  
I can take a good intention and turn it on its head  
I can make you pray to God and wish we'd never met

Nobody knows where this razor has been  
If you want something broke you better give it to me

Because I can make you hurt  
I can take you down so low I'll make you want to cry  
I can make you say goodbye  
I can make you hurt  
I can take you down so low and then you'll know that maybe  
You'd be better off when I'm not around

You'd be better off with somebody else  
So put me back on the shelf

See I'm the kind of person who can barely be loved  
I solve every equation with a push and a shove  
Now that I love you I'm afraid it's too late  
If you get too close I'll only push you away

I can make you hurt  
I can take you down so low I'll make you want to cry  
I can make you say goodbye  
I can make you hurt  
I can take you down so low and then you'll know that maybe  
You'd be better off when I'm not around

I was better lost before I was found  
I've got a history of misery so baby listen to me  
Put me back on the shelf and give this pain to somebody else

Cause I can make you hurt  
I can take you down so low I'll make you want to cry  
I can make you say goodbye  
I can make you hurt  
I can take you down so low and then you'll know that maybe  
You'd be better off when I'm not around

I can make you cry  
I can make you say goodbye  
I can make you hurt  
I can take you down so low and then you'll know that maybe  
You'd be better off when I'm not around
