

Touch

Darren Hayes

One touch, spark, electricity
Flame, burns, hot and viciously
Microscopic, glittery
Catalytic energy
Time need glow so flickering
Scintillation, glittering
Ember heat so viciously
Pulsing flow
Electricity
(Touch)

There's an energy
Washing chemically over me
I can't take it anymore
Like my destiny
Running endlessly over me
You're the one I'm waiting for
(Touch)
You know that we are the sun and the moon, the stars
Every time we touch
You know that we are the light
And the universe has been changed because we touched

Lava, Sun flash, so brilliantly
Incandescent energy
White, hot luminosity
Phosphorus intensity
Radiate so vividly
Beam of light transmitting a wave of
Glowing, glimmering, shining flash
Every time we touch
(Touch)

There's an energy
Washing chemically over me
I can't take it anymore
Like my destiny
Running endlessly over me
You're the one I'm waiting for
(Touch)
You know that we are the sun and the moon, the stars
Every time we touch
You know that we are the light
And the universe has been changed because we touched

One touch, spark, electricity
Flame, burns, hot and viciously
Microscopic, glittering
Catalytic energy
Time need oh so flickering
Scent, elation, glittering
Ember heat sun viciously
Pulsing flow
Electricity
(Touch)

I can't take it anymore

I can't take it anymore
(Touch)

There's and energy
Washing chemically over me
I can't take it anymore
Like my destiny
Running endlessly over me
You're the one I'm waiting for
(Touch)

You know that we are the sun and the moon, the stars
Every time we touch
You know that we are the light
And the universe has been changed because we touched
(Touch)

There's an energy
Washing chemically over me
I can't take it anymore
Like my destiny
Running endlessly over me
You're the one I'm waiting for
