

Touch The Sun

Darren Styles

Tell me now as darkness falls
You will always hear me come
A dream about you baby night and day
I close my eyes and kiss your lips
I've never had a night like this
As memories of a lonely life just fade away

As I touch the sun
As I dream today
I never feel afraid,
As I touch the sun and our worlds collide
I want you for the rest of my life

I want you for the rest of my life
