

World Falls Apart

Dash Berlin

When the world falls apart
I will hold you in my arms like a friend

When the world's unkind
I will make you smile
I will stay right by your side until the end

Through the dark of night
When no hope's in sight
When the walls start closing in, I'll be your friend

When the world falls apart
If you should ever feel so broken that you can't go on
If your world falls apart
I will hold you in my arms like a friend

When the world falls apart
If you should ever feel so broken that you can't go on
If your world falls apart
I will hold you in my arms like a friend
Until the end...

When the world's unkind
I will make you smile
I will stay right by your side until the end

Through the dark of night
When no hope's in sight
When the walls start closing in, I'll be your friend

When the world falls apart
If you should ever feel so broken that you can't go on
If your world falls apart
I will hold you in my arms like a friend
Until the end...
