

# Long Way

Daughtry

Dusty roads  
Hopeless nights  
Looking at.. blinding lights  
Saw your ghost here tonight  
It lingers on and I feel your life  
Pulling me back to the place  
But the thought of staring back at you is more than I can face  
And its a long way down  
From where I used to rest my head  
And its safe and sound  
If only I could turn around  
There's no direction where I stand  
Just dead end signs and wasted land.  
And its a long way down..  
To you

Dusty roads,  
Hopeless nights..  
Looking at blinding lights  
Saw your ghost,  
Its alive.  
It lingers on, feel your life.  
Pulling me back to the place...  
But the thought of staring back at you was more than I could face

And it's a long way now,  
From where I used to rest my head  
And it's safe and sound  
If only I could turn around  
There's no direction where I stand  
Just dead end signs and wasted land  
It's a long way down to you..  
To you  
To you  
To you...

Saw your ghost..  
It's alive.  
Lingers on, I feel your life..

And it's a long way now  
To where I used to rest my head  
And it's safe and sound  
If only I could turn around  
There's no direction where I stand  
Just dead end signs to wasted land  
And It's a long way down  
It's a long way down  
To where I used to rest my head  
And its safe and sound  
If only I could turn around  
There's no direction where I stand  
Just dead end signs to wasted land  
And it's a long way down to you...
